

# Universal Switch Replacement Kit

**WARNING!**

**Turn off power before servicing pump.  
Open faucets to relieve system pressure.**

	<b>PAR-Mate</b> Version I	44010 Series
	<b>PAR-Mate</b> Version II	44010 Series
	<b>PAR-Max</b> Version I	30XXX Series
	<b>PAR-Max</b> Version II	31XXX Series

## SWITCH REPLACEMENT

Jabsco Universal Switch Replacement Kit fits all previous models of PAR-Max and PAR-Mate pumps. Improved switch design is completely sealed for protection in Marine environments and long life. Switch cut-off pressure is factory set.

Turn off power before servicing pump. Open faucets to relieve system pressure. If pump is located below the supply tank, insure that the supply tank valve is closed to prevent water leakage during service.

Disconnect wires from terminals and remove old pressure switch from pump. Determine pump model

and vintage from the table and diagram above. Re-assemble parts for your model in sequence shown. Tighten intermediate screws (if used) to 15 inch-pounds of torque. Tighten switch screws to 7 inch-pounds of torque. Replace terminals with new terminals supplied in this kit.

Close all faucets. Turn power on to pump. Open faucet to bleed trapped air from system. When bubbles stop, close faucet and confirm that pump turns off automatically. Check for leaks and proper operation.
